

AgilityCare Health Operations Platform (AHOP)

System Access & Evaluation Instructions

Document version: 1.0

Date: June 2026

Prepared for: Course Instructor / System Evaluator

Live system URL: <https://ahop.jhewhome.xyz>

1. Purpose of this document

This guide provides everything needed to **access, navigate, and evaluate** the AHOP system deployed on a **cloud server (Google Cloud Platform)**. The platform integrates **clinical operations** (patients, OPD, laboratory, billing) with **medical equipment and IT asset management** in a single web application.

Use this document together with:

Document	Purpose
AHOP-SOURCE-CODE-AND-DOCUMENTATION.md	Technical architecture, database, security, source code
AHOP-USER-GUIDE.md	Detailed staff workflows by role
AHOP-DEPLOYMENT-GUIDE.md	Server setup and deployment steps

Source code repository: <https://github.com/jhewhome/ahop-snipe-it>

2. System access

2.1 Requirements

Item	Recommendation
Browser	Google Chrome, Microsoft Edge, or Mozilla Firefox (latest version)
Internet	Stable connection to reach the cloud server
Device	Desktop or laptop (layout is optimized for wider screens)
Login field	Use username — not email address

2.2 Login page

URL: <https://ahop.jhewhome.xyz/login>

1. Open the URL in your browser.
2. Enter a **username** from the table below.
3. Enter the password **demo1234**.

4. Click **Sign in**.

Note: All accounts below are **demo accounts** with sample data only. They are intended for academic evaluation, not for real patient information.

3. Demo accounts (role-based access)

Username	Password	Role	Best for evaluating
clinicadmin	demo1234	Clinic Administrator	Recommended starting account — full clinical, billing, reports, analytics, and equipment access
reception	demo1234	Reception	Patient registration, appointments, reception check-in
physician	demo1234	Clinic Staff (Physician)	OPD visits, clinical documentation, lab orders from visit
dr.santos	demo1234	Clinic Staff (Attending physician)	Same as physician; appears in attending-physician dropdowns
labtech	demo1234	Laboratory	Lab order processing and result entry
biomedical	demo1234	Biomedical Engineering	Medical equipment registry, maintenance, checkout/check-in

Suggested account for a full system tour: clinicadmin

4. Quick evaluation tour (approximately 15–20 minutes)

Log in as clinicadmin and follow this path. Direct links assume you are already logged in.

Step 1 — Dashboard (operations overview)

Action	Navigation
Open dashboard	Sidebar → Dashboard or https://ahop.jhewhome.xyz/

What to observe: Summary tiles for patients, OPD activity, laboratory, billing, and medical equipment status.

Step 2 — Patients (clinical records)

Action	Navigation
Patient list	Sidebar → Patients or https://ahop.jhewhome.xyz/patients
Open a sample patient	Click any row (e.g. Maria Santos Dela Cruz , patient no. AC-900001)

What to observe: Demographics, clinical summary, linked OPD visits, lab orders, appointments, and billing history on the patient profile.

Step 3 — Reception check-in

Action	Navigation
Check-in screen	Sidebar → Reception → Check-In or https://ahop.jhewhome.xyz/reception/check-in

What to observe: Walk-in registration and appointment check-in workflow.

Step 4 — OPD (outpatient department)

Action	Navigation
OPD visit list	Sidebar → OPD → Visits or https://ahop.jhewhome.xyz/opd-visits
OPD queue	Sidebar → OPD → Queue

What to observe: Visit documentation (chief complaint, assessment, diagnosis), visit status, and link to laboratory orders.

Step 5 — Laboratory

Action	Navigation
Lab orders	Sidebar → Lab Orders or https://ahop.jhewhome.xyz/lab-orders

What to observe: Order status (ordered → in progress → completed) and structured result entry.

Step 6 — Billing

Action	Navigation
Invoices	Sidebar → Billing or https://ahop.jhewhome.xyz/billing-invoices

What to observe: Invoice list, payment recording, and printable receipt.

Step 7 — Medical equipment & IT assets

Action	Navigation
Equipment list	Sidebar → Medical Equipment → List All or https://ahop.jhewhome.xyz/hardware
Equipment by status	Sidebar → Medical Equipment → status labels (e.g. In Use , Available)

What to observe: Asset tags (e.g. **AC-EQ-000001** ... **AC-EQ-000017** for medical devices, **AC-IT-000001** ... **AC-IT-000012** for IT assets), location, status, purchase cost, checkout/check-in actions.

If the list shows **“No matching records”**, see **Section 7 (Troubleshooting)**.

Step 8 — Clinical analytics & reports

Action	Navigation
Clinical analytics	Sidebar → Clinical Analytics or https://ahop.jhewhome.xyz/clinical-analytics
Operational reports	Sidebar → Reports → Clinical

What to observe: Charts and trends (OPD, laboratory, billing) and exportable CSV reports.

Step 9 — In-application staff guide

Action	Navigation
Staff guide	Sidebar → Staff Guide or https://ahop.jhewhome.xyz/staff-guide

What to observe: Built-in policies, role descriptions, and recommended clinic workflows.

5. Sample demo data reference

After deployment seeding, the cloud instance includes representative data for evaluation:

Data type	Examples
Patients	25 demo patients (AC-900001 ... AC-900025)
Medical equipment	17 units (AC-EQ-000001 ... AC-EQ-000017) with purchase costs
IT assets	12 units (AC-IT-000001 ... AC-IT-000012)
Clinical records	Sample OPD visits, appointments, lab orders, and billing invoices
Clinic sites	AgilityCare Main Clinic (and branch companies for multi-site demo)

All demo patient names and clinical details are **fictional**.

6. Role-based spot checks (optional)

To verify **role-based access control (RBAC)**, log out and sign in with different accounts:

Account	Should access	Should not emphasize
reception	Patients, appointments, check-in, billing (view/create)	Full equipment administration
physician	OPD, patients (clinical), lab order creation	System administration
labtech	Lab orders and results	Billing administration
biomedical	Medical equipment (full manage), maintenance	Patient billing edits
clinicadmin	All clinical modules, reports, analytics, users	—

Log out via the user menu (top right) → **Logout**, then sign in with the next account.

7. Troubleshooting

7.1 Medical equipment list shows “No matching records”

1. Confirm you are logged in as **clinicadmin** or **biomedical**.
2. Clear the **search box** on the table (click the **X** on the search field).
3. Press **Ctrl+F5** (hard refresh) to reload the page and styles.
4. If still empty, clear browser storage: **F12** → **Application** → **Local Storage** → remove keys starting with **assetsListingTable**, then refresh.

The development team can run a server-side repair if needed (`php artisan ahop:fix-asset-list` on the cloud VM).

7.2 Page looks outdated after an update

Press **Ctrl+F5** or open the site in a private/incognito window.

7.3 Cannot log in

- Confirm you are using **username** (e.g. **clinicadmin**), not email.
- Password is **demo1234** (all lowercase, no spaces).
- Contact the student developer (see Section 8) if the server is unreachable.

7.4 HTTPS certificate or connection errors

The site uses HTTPS (<https://ahop.jhewhome.xyz>). If the browser shows a certificate warning, contact the development team before proceeding.

8. Support contact

Item	Details
System name	AgilityCare Health Operations Platform (AHOP)
Live URL	https://ahop.jhewhome.xyz
Repository	https://github.com/jhewhome/ahop-snipe-it
Developer / group	<i>[Insert student name(s), section, and contact email/phone here before submission]</i>

9. Technical summary (for evaluators)

Aspect	Detail
Platform base	Snipe-IT (open-source IT asset management), customized with Laravel 11 clinical modules
Hosting	Google Cloud Platform (Compute Engine VM)

Aspect	Detail
Web stack	Apache, PHP 8.2+, MySQL/MariaDB
Security	Role-based permissions, authenticated sessions, HTTPS on production
Integration model	Modular monolith — patients, OPD, lab, billing, and equipment share one database and application

For full technical detail, see **AHOP-SOURCE-CODE-AND-DOCUMENTATION.md**.

10. Evaluation checklist (suggested)

Use this checklist when grading or reviewing the deployed system:

- ☐ Successfully logged in to the cloud URL
- ☐ Reviewed patient list and at least one patient profile
- ☐ Reviewed OPD visit workflow
- ☐ Reviewed laboratory orders and results
- ☐ Reviewed billing / invoice module
- ☐ Reviewed medical equipment list with status labels and purchase costs
- ☐ Reviewed clinical analytics or reports
- ☐ Verified different roles show appropriate menu access (optional)
- ☐ Confirmed system is usable on a standard desktop browser
